DFlash2 + D-MTP: ALLaVA fine-tuning

17,998 training images | 5 epochs | 2,815 updates per run | FP8 target cache, BF16 compute

Faint: every raw step. Solid: trailing 100-step mean (shorter window at start). Dotted: epoch boundary.

Training uses the reference first token; validation uses native MTP. Dense supervises seven slots, D-MTP six.
